Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 May 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claims 1-15, 17 and 19-23 are pending in this application.

Action Summary

1. Examiner acknowledges the cancellation of claims 16 and 18.
2. The rejection of claim 6 under U.S.C. 112, second paragraph as being indefinite is hereby withdrawn as applicant changed the dependency of the claim.
3. The rejection of claims 1-22 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Pat. No. 6,284,266 B1 is hereby withdrawn as a timely filed terminal disclaimer was filed.
4. The rejection of claims 1-6, 11-15 and 20-22 under 35 U.S.C. 102(b) over Argaud is being maintained for the reason stated in the previous office action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 19 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Argaud (US Pat. No. 4,963,360).

Argaud discloses a method for improving the absorption performance for the medicinal components to be applied to the skin; the absorption performance is generally

Art Unit: 1616

accelerated through warming comprising an exothermic package body having a layer containing a medicinal component (col. 1, lines 12-28). It is the examiner's position that the exothermic layer will heat the patient's skin since that temperature is higher than body temperature i.e. up to 45°C (col. 2, lines 1-6). The prior art reference of Argaud does not disclose to apply the apparatus when patient feels the onset of pain.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the apparatus to treat pain. The invention is directed towards improved absorption of medicinal components through the skin. If one of ordinary skill in the art employed a pain relieving medicinal component to the apparatus it would be obvious to employ the apparatus when the user feels pain to alleviate the pain.

Response to Arguments

6. Applicant's arguments filed May 27, 2003 have been fully considered but they are not persuasive.

Applicants' argue that Argaud does not teach the heating apparatus that heats for a predetermined temperature for a predetermined time. Argaud teaches a composition that when it is contacted with air causes an exothermic reaction. Since air is the fuel that causes the exothermic reaction, it is the position of the examiner that the amount of air supplied to the exothermic layer would determine the temperature and time. For example, the longer air is exposed to the layer the higher the temperature and

Art Unit: 1616

the longer the time would be, the shorter the exposure of air the shorter the time and lower the temperature. Therefore, Arguad teaches the claimed invention.

Allowable Subject Matter

7. Claims 7-10 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
